

## How to Use Setting Program of "Ribbon Capacity Setting"

1. Unzip the file and execute 'RibbonCapacitySetting.exe'

2. Connect a printer to a PC and check the program shows the right serial no of the printer. Please set the printer as guided at the below picture.

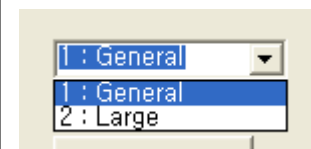

3. After setting the ribbon capacity of the printer, please reboot your printer.

1. Show the current setting

2. Select the menu you want to set at drop down box.

If you want to use 400 prints 1/2ymcKO ribbon, you should select Large

3. Select the type of ribbon capacity of your printer and then click setting button. After setting please close the program with exit button and reboot your printer.
